

## Custom Unique Manifold Solutions from M&W

M&W is a 100% CUSTOM hydraulic manifold specialist and it shows. Be it computers or manifolds, the world is racing toward "high value added" customization with those who can deliver first winning. STANDARD just doesn't cut it any more! The word CUSTOM implies CHANGE.

A standard bar manifold is a commodity. Commodities represent the lowest value layer in today's digital economy. Look around and you'll see that the most successful products combine unique ideas with quality. These unique value accelerators greatly enhance product performance and overall value. They have an ecology for success!

Custom manifolds are rapidly changed to meet ever-changing needs. M&W's demonstrated ability to embrace and quickly respond to changing customer requirements has resulted in our growth into an industry leading supplier of "build to order" custom manifolds. M&W can create a unique custom solution for your application: You can have an ecology of ONE!
